

What Is a Multiple in Math

What Is a Multiple in Math?

A multiple in math are the numbers you get when you multiply a certain number by an integer.

For example, multiples of 5 are: 10, 15, 20, 25, 30...etc.

Multiples of 7 are: 14, 21, 28, 35, 42, 49...etc.

An easy way to remember the multiples of single-digit numbers is by skip-counting. For example, if you count by 2s, you'll know the multiples of 2.

Remember, multiples can also be negative. So, some other multiples of 5 are: -5, -10, -15...etc.
